

AiFace-Pluto

Linux-Based Hybrid-Biometric Access Control & Time and Attendance Terminal with Visible Light Facial Recognition

Features

- Visible Light Facial Recognition
- Anti-spoofing algorithm against print attack (laser, color and B/W photos), videos attack and 3D mask attack
- Available card modules: 125kHz ID card (EM) RFID S50/S70 IC card(13.56MHz) 1k/4k
- Supplement light with adjustable brightness

2 meters of recognition distance and extra wide angle recognition

The recognition distance has been greatly extended to 2 meters, which significantly improves the maximum traffic rate. While most of the algorithms only support +/-15° of detectable face angle, AiFace-Pluto doubles the detection angle in terms of head rotation and tilt to +/- 30°.
